PERSONAL PROJECTS

Personal Portfolio Website

- Using JavaScript, HTML, and the Bootstrap CSS Framework, I created a personal portfolio website to better advertise myself and my accomplishments.

Language Translator app

- It is a translator app that supports any language and was created using Javascript and ReactJS. Enter a language to translate it into another language.

Spotify Clone

- Using HTML, CSS, and JS, I created a music player. The functions of a standard music player will all be present in this one. Songs that have been added can be added, played, paused, and searched for.
